

Global Energy Consumption over Time

Energy Sources

Power Generation: Top 20 Countries

Report On Global Energy Trends

Report On Global Energy Trends

- .The continent with the highest overall energy consumption is Asia and China continues to be the top consumer of power among all the countries.
- .Hydro electricity less been steadily rising over the last 3 decades and continues to be a promising renewable source.
- .Tidal energy takes up a major share of renewable energy with 42.95% and coal is at the top of non-renewable energy with 50.72%
- .Across the top 20 countries the sum of total(TWh)ranged from 12.40 to 1.819.94.
- .Biofuel and total geometrical energy are positively correlated with each other.
- .In a span of 28 years ,biofuel ranged from 3.88(TWh),geometrical ranged from 36.42(TWh) to 85.34(TWh),and Hydro ranged from 2,191,67 (TWh) to 4,197,29(TWh).
